PLUMA

Design Centro Stile Esperia

IT. La collezione nasce con l'idea di unire forme materiche e naturali al concetto di modularità e customizzazione. Immaginare una forma e realizzarla con i componenti Pluma.

Le strutture sono realizzate in ottone ed il diffusore per le sospensioni è disponibile in alabastro o opalino bianco.

La versione da terra presenta invece il nuovo "diffusore materico": una rete in ottone che si fonde con l'opalino bianco.

EN. The collection was born with the idea of combining material and natural forms with the concept of modularity and customization. Imagining a shape and creating it with Pluma components.

The structures are made of brass and the diffuser for the suspensions is available in alabaster or white opaline.

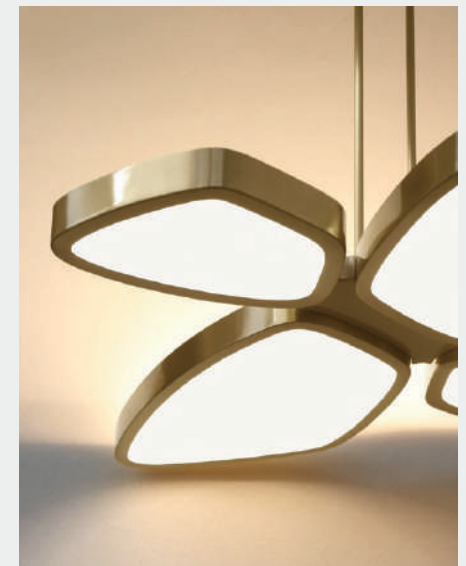

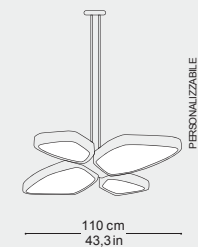

The floor version instead presents the new "material diffuser": a brass mesh that merges with the white opaline.
